PROFILE

Flutter Developer with strong experience in building cross-platform mobile applications using Dart and Flutter. Proficient in integrating RESTful APIs, implementing efficient state management, and following clean architecture principles to deliver scalable and maintainable codebases. Passionate about creating high-quality user experiences, optimizing performance, and continuously learning modern mobile development practices. A collaborative team player with strong problem-solving skills and a growth-oriented mindset.

PROFESSIONAL EXPERIENCE

4th Pyramids <i>Flutter Developer</i> Real Estate App – Propix8 - Implemented property discovery with detailed unit views. - Built a booking system for property visits and maintenance requests. - Managed offline and online state handling using internet connectivity monitoring. - Ensured graceful app behavior during network interruptions. E-Commerce App – Bynona - Developed product listing, search, category browsing, and filtering features. - Implemented shopping cart, wishlist, checkout, and order management. - Integrated RESTful APIs for products, categories, orders, and wishlist. - Implemented real-time stock updates to ensure accurate inventory management.	05/2025 – Present Mansoura, Egypt
Aliens Software <i>Flutter Developer</i> E-Learning App (Full Platform) - Developed a full-featured e-learning mobile application with user authentication. - Implemented course listing, video playback, quizzes, and progress tracking. - Built role-based access control for Students and Instructors. - Ensured scalable and maintainable architecture for learning workflows. Smart Scanner App (Barcode & Document Scanner) - Built a mobile scanning application for documents, QR codes, and barcodes. - Implemented automatic document cropping, image enhancement, and PDF export. - Added scan history storage and folder-based organization. - Integrated cloud backup to sync and secure scanned files.	2022 – 2023 Mansoura, Egypt

PROJECTS

Chat Application (Flutter & Firebase) The app allows Authentication, manage their online/offline status, and send/receive instant messages and media through Cloud Firestore.	02/2025 – 04/2025
Book Store & Reader App (Flutter & RESTFUL API) The app allows users to login and signup to browse books by category, view detailed book information, purchase premium content, and read books directly within the app using a built-in PDF reader.	05/2023 – 07/2023
Colon Cancer Detection App(Flutter & Machine Learning API) Developed a mobile application using Flutter to assist in the early detection of colon cancer by analyzing patient data and providing predictive results.	01/2023 – 04/2023

- The app allows users or healthcare professionals to input relevant medical information such as age, tumor marker It communicates with a backend API powered by a trained machine learning model that returns the probability of colon cancer.

TECHNICAL SKILLS

- | | |
|--|--|
| • DART — Proficient | • FLUTTER — Proficient |
| • FIREBASE — Competent | • HIVE— Amateur |
| • BLOC PATTERN — Competent | • GOOGLE MAPS — Amateur |
| • AI Tools (Widsurf, Cursor) — Competent | • Firebase Cloud Messaging (FCM) — Competent |
| • Local Notifications — Competent | • CLEAN ARCHITECTURE — Competent |

EDUCATION

KAFR EL-SHEIKH UNIVERSTY	01/2019 – 06/2023
<i>BACHELOR OF COMPUTERS & INFORMATION</i>	
Major: Bioinformatics Grade: Good GPA: 2.66/4.00	

LANGUAGES

Arabic — Native	English — Amateur
